PROFESSIONAL SUMMARY

Information Systems Analyst and advanced Information Systems Engineering student with experience in IT support, data analysis and validation, incident diagnosis and resolution in production environments, and application development. Hands-on experience in exploratory data analysis, data cleaning and validation, and Machine Learning techniques in academic and research projects. Knowledge of Python, SQL, Business Intelligence and analytics tools, REST APIs, and software development. Interested in Data Analytics, Data Science, AI, and process automation.

TECHNICAL SKILLS

Data & Analytics: Python (Pandas, NumPy, Scikit-learn), SQL, Power BI, Tableau, IBM SPSS Statistics, IBM SPSS Modeler, KNIME, dbt, data processing, data cleaning and validation, exploratory data analysis (EDA), dashboards and KPIs.

AI & Machine Learning: Machine Learning fundamentals, predictive modeling and classification, clustering, IBM SPSS Modeler, Prompt Engineering, Large Language Models (LLMs), Neural Networks / Deep Learning.

Databases: PostgreSQL, MySQL, SQL Server, Oracle (PL/SQL), MongoDB.

Backend, APIs & Integrations: Node.js, Express, Supabase, REST APIs, JWT, Firebase, Postman, and integration troubleshooting.

Systems & Support: Windows, Linux, software installation and configuration, hardware diagnostics, workstations, troubleshooting, and end-user support.

Cloud & Tools: Firebase Auth/Firestore, AWS (IAM, EC2, S3), Git/GitHub/Bitbucket, Jest, Cypress, Scrum/Kanban.

Frontend: React, Angular, Next.js, TypeScript, JavaScript ES6+, HTML5, modern CSS.

Networking: IP configuration, connectivity, Wi-Fi, and network diagnostics.

PROFESSIONAL EXPERIENCE

Research Collaborator (Data Science) — National Technological University (UTN) | Rosario

Sep 2026 – Present

Multidisciplinary research project aimed at improving addiction treatment through data science and machine learning.

- Conducted exploratory data analysis (EDA) to identify patterns and relationships among patient characteristics, habits, diagnoses, and treatment metrics.
- Took part in biweekly follow-up meetings on research methodology and design, contributing to the interpretation of results.
- Contributed to defining lines of work for the subsequent clustering analysis of patients.

IT Support Intern — Hospital de Emergencias Dr. Clemente Álvarez (HECA) | Rosario

May 2025 – Jan 2026

Resolved technical incidents in critical, high-availability environments.

- Analyzed logs and diagnosed failures in applications and services.
- Troubleshoot APIs and integrations between systems.
- Documented incidents and technical procedures to streamline resolution of recurring issues.
- Diagnosed connectivity issues and problems with workstations and computer equipment.
- Installed and configured workstations.

Systems Intern — Rosario Public Health Department | Rosario

Aug 2024 – May 2025

- Performed functional validation of applications used in production environments.
- Diagnosed and tracked incidents across application, database, and operating system layers.
- Detected and corrected inconsistencies in production data.
- Provided user support and validated changes before deployment.

PROJECTS

JobQuest – Job Search Management Platform

Serverless web application for managing job applications, interviews, and selection processes.

- Interactive dashboard with metrics for tracking applications.
- CSV data export for analysis and reporting.

Technologies: Angular, TypeScript, Firebase, Cloud Firestore.

GitHub: <https://github.com/Miguel58000/JobQuest>

Demo: <https://job-quest-ten.vercel.app/>

Balances – Personal Finance Platform

Application for personal finance management and analysis with real-time synchronization.

- Dashboard for income and expense analysis.
- Consolidation and validation of financial information.

Technologies: Vite, TypeScript, Firebase, Firestore.

GitHub: <https://github.com/Miguel58000/Balances>

Demo: <https://balances-ten.vercel.app/>

Help Desk System – Ticket & Incident Management

System for managing and tracking technical support requests.

- Operational metrics for incident tracking.
- Analysis of ticket patterns and resolution times.

Technologies: Vite, TypeScript, Firebase.

GitHub: <https://github.com/Miguel58000/Help-Desk-Pro>

Demo: <https://help-desk-pro-eight.vercel.app/>

QR Ticketing System – Event & Ticket Management

Full-stack application built as a team for ticket sales and QR-code ticket validation.

- REST APIs for event and ticket management.
- Mercado Pago integration and JWT authentication.

Technologies: Next.js, TypeScript, Supabase, PostgreSQL, Prisma, Node.js, Mercado Pago, JWT.

GitHub: <https://github.com/estebannbn/frontend-ticketeraqr>

Demo: <https://frontend-ticketeraqr.vercel.app/>

EDUCATION

National Technological University (UTN) — Information Systems Engineering (in progress)

Intermediate degree: Information Systems Analyst · GPA: 7.38 / 10

LANGUAGES

Spanish: Native

English: C2 – Cambridge Proficiency (CPE)

ADDITIONAL INFORMATION

- Salesforce Trailhead Double Star Ranger
- Flexible availability / on-call
- Interest in Data Analytics, Data Science, AI, automation, and cloud
