PROFESSIONAL SUMMARY

Information Systems Analyst and advanced Information Systems Engineering student with experience in IT support, data analysis, and full stack web application development. Experienced in incident resolution, data validation and processing in critical production environments, application and integration troubleshooting, log analysis, and task automation focused on process optimization and data quality improvement.

Skilled in developing modern applications using Angular, React, Next.js, TypeScript, Node.js, and Firebase, as well as working with SQL and NoSQL databases such as PostgreSQL, MySQL, SQL Server, Oracle, and MongoDB.

Also knowledgeable in serverless architectures, REST APIs, JWT authentication, testing, Linux, Git, cloud tools, and data visualization using Excel and Power BI.

Strong analytical mindset, problem-solving orientation, adaptability, and ability to quickly learn new technologies and work environments.

TECHNICAL SKILLS

Data & Analytics

Data analysis and validation

Data cleaning (duplicates, inconsistencies, errors)

SQL (PostgreSQL, MySQL, SQL Server, Oracle)

Excel (Pivot Tables, VLOOKUP, XLOOKUP)

Python (pandas, NumPy, data automation)

Power BI (Dashboards, KPIs, data visualization)

Frontend

React (hooks, components, routing, forms)

TypeScript

JavaScript ES6+

Next.js

Semantic HTML5 and modern CSS

Angular 21

Firebase SDK

Backend

Node.js (JavaScript / TypeScript)

REST API development and integration

Basic knowledge of PHP and Laravel

APIs & Integrations

REST API troubleshooting

JSON payload validation
Token-based authentication (JWT)

Databases

Relational: PostgreSQL, MySQL, SQL Server, Oracle (PL/SQL)
Non-relational: MongoDB

Cloud & Serverless

AWS fundamentals (IAM, EC2, S3)
Serverless architecture principles
Cloud logging and monitoring concepts
Firebase Auth
Cloud Firestore
Serverless architectures

Testing & Quality

Unit, integration, and end-to-end testing (Jest, Cypress)
Exploratory and regression testing
API testing with Postman
Log analysis and root cause diagnosis

Infrastructure & Tools

Linux and Windows
Git, GitHub, Bitbucket
Microsoft Excel (Intermediate level)
Salesforce (Trailhead Double Star Ranger)

Work Practices

Agile methodologies (Scrum, Kanban)
Clear technical documentation
Knowledge of SDLC and QA
Distributed team collaboration

EXPERIENCE

IT Support Intern

Hospital de Emergencias Dr. Clemente Álvarez — Rosario
May 2025 – Jan 2026

Incident resolution in critical environments (access, networking, performance)
Log analysis and diagnosis of operating system and application failures
Troubleshooting APIs and production integrations
Documentation of incidents and technical procedures

Systems Intern

Secretaría de Salud Pública de Rosario — Rosario
Aug 2024 – May 2025

Functional analysis and validation of production applications
Diagnosis of issues between applications, databases, and operating systems
Detection and correction of inconsistencies in production data, improving information quality for decision-making
User support and validation of changes before deployment

PROJECTS

QR Ticketing System – Full Stack Web Application

Team development of a web platform for event management, ticket sales, and QR code access validation. Includes JWT authentication, Mercado Pago API integration, and automated email notifications with Nodemailer. Backend developed with Node.js, Express, and Prisma using PostgreSQL (Supabase), and frontend built with Next.js and TypeScript, deployed on Vercel.

Backend: <https://github.com/estebannbn/backend-ticketera-qr>

Frontend: <https://github.com/estebannbn/frontend-ticketeraqr>

Demo: <https://frontend-ticketeraqr.vercel.app/>

JobQuest – Job Application Tracking Platform

Development of a modern web application for managing job applications, interviews, and recruitment process tracking using a fully serverless Firebase architecture.

Includes an interactive dashboard with visual metrics, drag & drop Kanban board, secure authentication, multilingual support (EN/ES), CSV data export, and dark/light mode.

Complete migration from a traditional Node.js backend to Firebase Auth + Cloud Firestore, simplifying infrastructure and improving deployment scalability and user experience.

Technologies: Angular 21, TypeScript, RxJS, Firebase Auth, Cloud Firestore, and Vercel.

Repository: <https://github.com/Miguel58000/JobQuest>

Demo: <https://job-quest-ten.vercel.app/>

Balances – Personal Finance Management Platform

Development of a web application for financial tracking with real-time synchronization using Firebase (Auth and Firestore), enabling multi-device persistence and access. Includes a data unification system to maintain transaction integrity, internationalization (i18n), and a modern interface with data visualization.

Financial dashboard visualization for spending pattern analysis.

Repository: <https://github.com/Miguel58000/Balances>

Demo: <https://balances-ten.vercel.app/>

Help Desk System – Ticket Management Platform

Development of a web-based support ticket management system with incident categorization, priority assignment, stock management, and lifecycle tracking.

Includes filtering tools, operational metrics, and analysis features aimed at improving visibility and organization in IT support environments.

Ticket data analysis for identifying incident patterns and optimizing resolution times.

Repository: <https://github.com/Miguel58000/Help-Desk-Pro>

Demo: <https://help-desk-pro-eight.vercel.app/>

Veterinary Management System – Full Stack Web Application

Team development of a management system for handling clients, appointments, and medical records, including secure authentication and REST API data validation. Focused on improving internal user experience and service continuity.

Backend: <https://github.com/maurojizz/back-end-Veterinaria>

Frontend: <https://github.com/maurojizz/Veterinaria-front-end>

Demo: <https://veterinaria-front-end.vercel.app/>

EDUCATION

Information Systems Engineering – UTN FRRo

(2020 – Present)

GPA: 7.43 / 10

Information Systems Analyst – UTN FRRo

(2020 – 2026)

GPA: 7.38 / 10

ADDITIONAL INFORMATION

Flexible availability and on-call availability

Interest in automation, cloud technologies, and process improvement
